Birding Greece

Checklist of the Birds of Greece

487 species and taxa · following AviList (2026) and the Hellenic Rarities Committee

Main Checklist

Species formally accepted and published by the HRC and which are recognised as full species under AviList taxonomy.

SEEN	NO	SPECIES	CATEGORY	RARITY CODE	STATUS	IUCN
☐	1	**White-headed Duck** *Oxyura leucocephala*	A	3	W	EN
☐	2	**Mute Swan** *Cygnus olor*	A	1	R/W/PM	LC
☐	3	**Bewick's Swan** *Cygnus columbianus*	A	2	W	LC
☐	4	**Whooper Swan** *Cygnus cygnus*	A	2	W	LC
☐	5	**Brent Goose** *Branta bernicla*	A	5	Vag	LC
☐	6	**Red-breasted Goose** *Branta ruficollis*	A	3	W	VU
☐	7	**Snow Goose** *Anser caerulescens*	A	5	Vag	LC
☐	8	**Greylag Goose** *Anser anser*	A	2	R/W	LC
☐	9	**Lesser White-fronted Goose** *Anser erythropus*	A	3	W	VU
☐	10	**Greater White-fronted Goose** *Anser albifrons*	A	2	W	LC
☐	11	**Tundra Bean Goose** *Anser serrirostris*	A	4	W	NE
☐	12	**Taiga Bean Goose** *Anser fabalis*	A	5	Vag	NE
☐	13	**Common Shelduck** *Tadorna tadorna*	A	1	R/W/PM	LC
☐	14	**Ruddy Shelduck** *Tadorna ferruginea*	A	2	R/W/PM	LC
☐	15	**Long-tailed Duck** *Clangula hyemalis*	A	4	W	VU
☐	16	**Common Eider** *Somateria mollissima*	A	4	Vag	NT
☐	17	**Common Scoter** *Melanitta nigra*	A	4	W	LC
☐	18	**Velvet Scoter** *Melanitta fusca*	A	3	W	VU

Pending HRC Acceptance/Evaluation

Additional species recorded in Greece in recent years and included in eBird's Greek bird list but not yet added into the HRC's published national list. These include records awaiting formal evaluation by the Committee, as well as records that may already have been accepted but are awaiting publication in the following annual national reports.

Category (Hellenic Rarities Committee)

A: Recorded in an apparently natural state at least once since 1 January 1950
B: Recorded in an apparently natural state only between 1800 and 1949
C: Introduced species with established, self-sustaining populations
D: Possibly wild, but a natural origin is uncertain
E: Escapes or releases from captivity
NE: Not (yet) evaluated by the Hellenic Rarities Committee

Status (a species can combine several, e.g. W/PM)

R: Resident
SV: Summer visitor
W: Winter visitor
PM: Passage migrant
Vag: Vagrant
Ex: Extinct
(?): Status uncertain

IUCN (global Red List category)

LC: Least Concern
NT: Near Threatened
VU: Vulnerable
EN: Endangered
CR: Critically Endangered
EX: Extinct
NE: Not Evaluated

Our Rarity Codes

Code 1: Common species. Widespread resident species, common breeding, migratory and winter visitors, frequently occurring throughout most of mainland and/or island Greece (including common seabirds).

Code 2: Uncommon species. Regularly occurring resident and/or visiting species that are generally less numerous, less widespread, or more regionally distributed (e.g., only in Northern Greece) than Code 1 species. Note that some species in this category may be harder to observe (due to their habits or distribution) than some in Category 3.

Code 3: Scarce species. Annual visitors with only a few records in Greece each year or resident and breeding species with an extremely restricted range (e.g. Capercaillie, Bearded Vulture, Pheasant). This includes established winter visitors with very small or restricted populations (e.g. Lesser White-fronted Goose, White-headed Duck), as well as most species that were until recently included in the Committee's "Rare Birds List" (e.g., Velvet Scoter, Blue-cheeked Bee-eater).

Code 4: Rare species. Species that occur irregularly and not annually in Greece, with at least 5 documented records during the last 30 years, showing an established but irregular pattern of occurrence. This category includes occasional (but not annual) winter visitors (e.g. Common Eider, Pallas's Gull), as well as rare species that only very recently established a known wintering site (e.g., Finsch's Wheatear, Pine Bunting).

Code 5: Accidental species. Species with fewer than 5 documented records in Greece during the last 30 years, only occurring as accidental vagrants.

Code 6: Extinct species. Species listed in Greece's checklist, but which have either become globally extinct (Slender-billed Curlew) or, due to their current distribution, are unlikely to be observed again in the country (Black Francolin). This includes introduced species that once maintained viable populations but are now observed only as escapees (Red-legged Partridge).
